Nenana Valley, North Alaska Range, Alaska

Summer Field School in Alaskan Archaeology and Paleoecology

Sponsored by Center for the Study of the First Americans
Department of Anthropology, Texas A&M University

May 31 - July 1, 2016

ANTH 330: Field Research in Anthropology (6 cr hrs)
Instructors: Angela Gore, Yan Axel Goméz Coutouly, Kelly Graf

This field school will focus on the archaeological and paleoecological records of interior Alaska. Using the beautiful northern foothills of the Alaska Range as an outdoor laboratory, students will explore the landscapes traversed by early Alaskan hunter-gatherers. Students will learn about prehistoric and paleoecological records of the region by identifying glacial and periglacial landforms, mapping thick loess profiles, surveying for lithic raw materials, testing archaeological sites, and excavating the multicomponent archaeological site of Little Panguingue Creek. JOIN US!!

Costs
TAMU tuition & fees plus field school logistics fee of $900
